For the week of *Wednesday, Dec. 2nd, 1998*

**Important Issues**

December 6th is CANADA'S NATIONAL DAY OF REMEMBRANCE AND ACTION ON VIOLENCE AGAINST WOMEN. On this day in 1989, 14 women were killed by one man in Montreal, Canada. Violence is a global issue. Women and girls around the world face emotional and physical abuse, rape, sexual assault, genital mutilation, dowry deaths, sexual slavery, female infanticide... Violence is a chosen response. Men must take responsibility for their actions. Every community and every institution must work to build a culture of safety, equality and justice for women and children. IN COMMEMORATION of the women lost on December 6th, 1989 a candlelight Vigil is being held in their memory. Please help us remember. Wednesday, December 9th at 4:00pm. at the Anglican/United Church - Dominion Street. Address by Rev. Michael Batten.

This is a very serious issue we have in our world, and if you know anybody or are a victim of this terrible crime, there is help out there for you. Remember, you are not alone, and if we all pull together we as a nation can put a stop to all this violence. There is Help and it starts with you!! - Broom

**COMMUNITY ANNOUNCEMENTS**

**Internet Corner**

So, you now know how to get on the net, but what is it, and how did it start? The World Wide Web and the Internet started out as a forum for research and education. It wasn't originally meant to support the public. However the public jumped in anyhow, and now the Internet is this wonderful international communications network that brings people from all over the world together. At first, people who weren't computer scientists were limited to communicating with e-mail and through the news groups. They could surf the Web, but the average person couldn't distribute information over the Web because it required hardware access and know-how. Both these barriers have crumbled considerably over the past two years. I think that the Web is a tool that will open up many markets and fields to the public. No longer is the public limited to watching commercials and the television shows that people with money are dishing out. Now the public can give anyone who is starting out in any profession or field or hobby access to information and people who would otherwise be out of reach. A new musician can make his music available to a global audience, a student in Australia can make his thesis and research information available to academics all over the globe, and an entrepreneur in Iceland can advertise and sell his products to a global audience. All of these things can be achieved by anyone who has access to the Internet and a willingness to learn a little bit. Good Luck, ADAMASTER ADAM@cancom.net
