HAPPY CANADA DAY!!!

Celebrate Canada Day! Come and join us in the Village Park on Canada Day, July 1st. Street Hockey, Fun in the Park, Children's games, BBQ, Canada Day Cake, and more. Fireworks and music at dusk. Kick off summer with a bang and celebrate living in the best country in the world! For more info or to help out call 569-3366.

THANK YOU!

Thanks to the Community who Helped Raise this Child. Many thanks to the friends & family who have been there for Kaylee throughout her growing years & who we know will always be there! - we love & appreciate you so much that words just can't express it all. Many thanks to all of you who came out to the potluck in the Shop, we heard that everyone had fun, right on!! Also thank you to those who gave her such lovely words of wisdom to live by & also for the unique & generous gifts. This is an incredible Valley we live in.

"Friends are the flowers in the garden of life". THANK YOU to my wonderful girlfriends who brought plants and seeds etc. and planted my whole huge veggie garden while our family had to be away in PG. Thank you as well for minding the dogs, cats, chickens and horses (who kept escaping). I am a very lucky woman!

-Sharon Mortensen.

Glenn & Anyla Daykin from Spindrift Powersports would like to extend a large thank you to everyone for being patient and understanding while the shop hours were unpredictable when we were waiting for our baby to be born. THANK YOU! The shop is now open regular hours again and we will be more than happy to help you with your needs.

HOSPITAL NEWS

BANFIELD MARINE SCIENCE CENTRE

Banfield Marine Science Centre is a world-class teaching and research facility located on the west coast of Vancouver Island, Canada. The Marine Centre supports diverse coastal and marine research of the highest calibre and is recognized as among the very best research and training facilities in the world. This trip will provide our students an opportunity to explore the diversity of this dynamic coastal environment, from exposed rocky shorelines, expansive sandy beaches, productive estuaries, and ancient coastal temperate rainforests. They will be involved in numerous labs and trips to remote beaches and out into deep ocean on a research vessel which will entail observing marine mammals and birds and sampling from the subtidal environment. The sample is collected using a dredge net and yields different organisms, including sea stars, urchins, octopuses, crab, fish, sea cucumbers, and many others that are not found in the intertidal zone. Mrs. Howard and Mr. Belkus will be taking the classes to this remarkable research station sponsored by 5 universities for an unforgettable experience.
